

# TeamAssist – Managed Services for the Now Platform

The Now Platform from ServiceNow has become a critical asset for many organisations with IT departments expected to deliver a seamless high quality service, great end user experience and innovative solutions.

Outsourcing the management and administration of the Now Platform will enable you to reduce costs whilst improving service delivery and business agility. Your team can focus on developing the functions and applications that drive business improvement and productivity gains.

## How you benefit from TeamUltra's Managed Services

TeamUltra's Managed Services provide the benefits of an in-house team, whilst enjoying the cost advantage and reassurance of using an outsourced service underpinned by accredited ServiceNow professionals:

### Total Solution

Our Managed Services cover every aspect of administering, supporting and managing the Now Platform. Services are delivered by accredited and experienced ServiceNow Consultants.

### Benefits

- Single point of contact for all calls
- Frees your staff to focus on other key business activities
- Keeps the Now Platform operating at peak efficiency

### Commercial Model

We offer a simple business model that is easy to monitor and gives you full control of the budget. It contains flexibility to include enhancements and larger developments.

### Benefits

- Agreed spend that is monitored and managed
- Regular quarterly payments to smooth cash flow

### Flexible Solution

Every aspect of our Managed Services is tailored to meet your unique requirements. This gives you a personal service and full management control.

### Benefits

- Tailored services according to requirements, resource & budget
- Support hours to fit your business model
- Additional resource available as and when needed

### Management Control

Our Managed Services enable customers to maintain control of their Now Platform without worrying about day-to-day issues. You are allocated a named Service Manager.

### Benefits

- Agreed SLAs and regular Service Reviews ensure performance levels are met
- Trend Analysis highlights areas for improvement
- Dashboards monitor day-to-day activities alerting you to issues

### Continuous Service Improvement

We aim to ensure continuous service improvement by establishing a baseline of current service delivery and use that as a benchmark to improve both the customer experience and service levels.

### Benefits

- Improved end-user experience
- Exploits full power of the Now Platform to achieve increased service levels
- Delivery efficiency and effectiveness
